Marking Scheme

Quiz Paper

BSc CE

Programming Language (630203)

First Quiz (A)

Second semester

Date: 15/03/2011

Section 1

Weighting 5% of the module total

Lecturer:

Dr. Qadri Hamarsheh

Coordinator:

Dr. Qadri Hamarsheh

Internal Examiner:

Dr. Emad Khalaf

Marking Scheme

Programming Language (630203)

Marking Assignments

Question 1 This question is attributed with 5 marks if answered properly; the answers are as following:

- Which of the following types are not built into the C++ language?
 - bool
 - real
 - short
 - int
- The difference between “==” and “=” in a C++ statement is that the first denotes “test for equivalence” and the second means:
 - compare
 - assignment
 - same
 - not exactly equal

- The output of the following code

```
int x=9, y=8;  
cout<<x*y;
```

Will be

- 1
 - 1.25
 - 0.8
 - None of them
- The function that must always return control to the operating system is known as:
 - private
 - header
 - initial method
 - main
 - Suppose that alpha and beta are int variables. The statement `alpha = ++beta;` is equivalent to the statement(s) _____.
 - `beta = beta + 1;`
`alpha = beta;`
 - `alpha = beta;`
 - `beta = beta + 1;`
`alpha = alpha + beta;`
 - `alpha = beta + 1;`
