

**Philadelphia University**

**Faculty of Business**

**Department of Finance and Banking**

**Course Syllabus**

<b>Course Title: Graduation Project</b>	<b>Course code: 0320480</b>
<b>Course Level: Department requirement</b>	<b>Course prerequisite :</b>
<b>Lecture Time :</b>	<b>Credit Hours : 3</b>

**Academic Staff Specifics**

<b>Name</b>	<b>Rank</b>	<b>Office Number / Location</b>	<b>Office Hours</b>	<b>E-mail Address</b>

**Course Module Description :**

The graduate research project investigates a research problem in the field of finance and banking in order to train the student and help him to think to prepare and implement the study project and put it in a manner that is consistent with the rules of scientific study, The course aims to provide the student with research skills in terms of identifying the problem of the study and formulating the questions expressed and ways to answer them. It also aims to conduct the necessary statistical treatments, collect statistical data, and finally offer the results.

**Components of the research project :**

The study project consists of four parts, in the following order: Part 1: Preface pages, Part II: chapters , Part 3: References and Part 4: Supplements and figures

Part I: Preface pages :

1- Title page: contains

A - Study Title: Reflects the objective content of the study and its field

B- Name of student who prepared the study

C- Professor Supervisor

D- The study was completed to obtain a bachelor's degree in finance and banking

2- Thanks and appreciation page

3- Dedication page

- 4- Contents page : The purpose is to facilitate the access of the continental information within the study
- 5- Table list page
- 6- figure list page
- 7-appendex list page
- 8- Abstract page : The aim is to give the general idea of the study: objective, methodology and results

## **Part 2 : Study Chapters**

### **Chapter 1**

- 1- Introduction
- 2- The problem of the study: The student can guide them through previous studies, scientific letters or supervisor, etc
- 3- Hypotheses of the study :reflect The relationship between the variables in the problem of the study and usually its in the form of questions and represents the imposition of a temporary solution to the problem of study
- 4- Procedural Definitions: Contains definitions of concepts contained in the title and questions of the study
- 5- The importance / objectives: It aims to explain the theoretical and practical addition that the study provides
- 6- Determinants of the study: It includes the boundaries of temporal, spatial and human study

### **Chapter 2 : Theoretical framework and previous studies**

- A- Theoretical framework : Is a review of intellectual production and represents the previous efforts in the field of study and what is contained in the books on the subject
- B- previous studies : it is intended to review the previous studies related to the study of the student to be in accordance with the conditions of credibility and correct documentation

### **Chapter 3 : Method and procedures**

- A- Methodology: The method used in the study may be descriptive or experimental or historical approach and may be quantitative or qualitative approach, the student should be indicate the sources of data that will be obtained
- B- Study community: The student must determine the target sample and indicate its size and type
- C- Study tools: Quantity such as questionnaire, and quality such as interview or observation
- D- Study Procedures: Any steps taken to complete the study
- E- statistical analysis
- F- Stability and accuracy

### **Chapter 4- Study results**

- A- View the results of the student
- B- Answer the study questions and the results of the hypothesis test

### **Chapter 5- Discussion of results**

**Part 3 - References:** there are two parts of the list / Arabic references and English references They include all the references mentioned in the research and they arranged according to the name of the family.

**Part 4- Appendix and Figures :** it comes numbered and addressed according to their content

**\*The student is evaluated as follows**

First Exam	Chapter 1 :the study problem Chapter 2 : : Theoretical framework and previous studies	20 Mark
Second Exam	Chapter 3 : Method and procedures , Preparation of the questionnaire, data collection and analysis	20 Mark
Homework's	Organization and commitment to the terms of scientific research and regular review of the supervisor	20 Mark
Final Exam	Chapter 4: the Result Chapter 5 :the Result desiccation
