IRO MODELS WORKSHOP

General objective of the WS

Provide examples of different models of IROs as starting points for discussion, to find the adequate IRO model for the MEDA Region and that every institution is able to create and manage its own IRO.

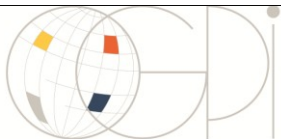

Description of the WS

In order to promote discussion and analysis among partners about the models presented and of their IRO structures, the workshop will have three working sessions, and a space of discussion will follow on what these models can offer, and how they could be adapted to the regional and local context.

The workshop is including the suggestions provided by the partners after the last event in Amman.

Specific objectives of the WS

- Demonstrate different working models of IRO;
- Promote debate on which of these can be considered as the “best” model for the MEDA region;
- Provide the opportunity for Partner Country institutions to examine these different models in depth;
- Share examples of IRO models and functionalities worthy of note in the Partner Country institutions.
