Algebra, Topology, Mathematical Statistic, Matrix Analysis, Methods of applied mathematics.

AREA OF RESEARCH:

Thesis: SOME PROPERTIES OF THE ZERO-DIVISOR GRAPHS OF IDEALIZATIONS.

Some properties of the idealization of a module in a ring are given. The basic known properties of such graphs are reviewed such as: diameter, and girth. Also, we study the girth, and the diameter of the zero-divisor graphs of a ring when extending to idealizations of the ring. Finally, We give new result, the diameter of the zero-divisors of the graph of $Z[\alpha](+)Z_n$ and of $Z_m[\alpha](+)Z_n$ are computed, the diameter of $R(+)M$ when R is an integral domain is computed.
