Module Syllabus

Module Name: Adult Nursing II/Clinical
Module Number: 910244

Level: 2nd year
Credit Hours: 3 credit hours
Prerequisite / Co-Requisite: Co-request with adult II theory

Aims (Module Purpose):
This course is designed to provide nursing students with the skills required to care competently and safely for a wide variety of patients in different specialty areas. Care of adult patients with specific and complex problems will be studied. Nursing process as a mean of maintaining physiological, psychological and socio cultural integrity is applied. Critical analysis of patient's data and responses to nursing interventions are emphasized.

Teaching Methods:
Lab sessions, in the first week of the semester, practicing advanced and fundamental nursing skills on patient, direct case round, providing direct patient care in the hospital settings.

Learning Outcomes:
Specify individual learning outcomes you expect students to achieve during the module, using appropriate action verbs (define, demonstrate, analyse, compute, explain design,... etc.) to begin each statement.

At the end of this module, student will be able to:
* Provide competent and safe nursing care to patients in the following areas: ICU, CCU, recovery room, O.R, burn unit, orthopedic, hemodialysis, neurosurgery.
* Master skills related to the following procedures:
  * Artificial ventilation.
  * O2 Therapy.
  * ECG
  * Resuscitation.
  * Caring of CVP line, arterial line, chest tube.
  * Tracheostomy and gastrostomy care.
  * Administering medications for patient admitted to ICU, CCU.
* Provide care to unconscious patients.
* Carry out emergency procedures.
* Identify complications either potential or collaborative.
* Work according to priorities.
* Demonstrate teaching abilities.
Specific learning outcomes:

* Construct a continually modified nursing care plan based on the medical patients changing conditions: cardiovascular, respiratory, gastro-intestinal tract, endocrine and metabolic disorders, and oncology.
  - Perform physical assessment using auscultation, palpation, percussion and inspection.
  - Obtain a concise patient history.
  - Assess and record vital signs.
  - Assist the patient undergoing diagnostic procedures: ECG, paracentesis, thoracentesis, blood and urine specimen.
  - Interpret results of diagnostic procedures and laboratory findings.

* Provide nursing intervention according to the individualized patient's needs.
  - Provide basic comfort measures: positioning and bed making, turning, lifting, ambulation, elimination, hygienic measures, safe environment.
  - Perform therapeutic procedures according to patient's needs: pressure ulcer care, gavage feeding, suctioning: oropharyngeal, nasogastric, oxygen therapy, tube irrigation, catheter care, rehabilitative measures and precaution: chest physiotherapy, exercises, positioning with rehabilitative devices.
  - Administer oral and parenteral medication following the five rights and principles of asepsis.
  - Identify signs of medication toxicity.
  - Obtain and label routine specimen.
  - Provide special care for: cancer patients, AIDS patients, immobile patients, unconscious patients.
  - Prepare a balanced plan for fluid & nutritional intake.
  - Provide health teaching to patients and their families.
  - Provide psychological care to patients and their families.

* Record and or report essential data pertinent to patients and nursing intervention.

Contribution to Program Learning Outcomes:

(Knowledge and Understanding, Intellectual Skills, Practical Skills, Transferable Skills,...etc).

* Make-up exams will be offered for valid reasons only with consent of the Dean. Make-up exams may be different from regular exams in content and format.

Attendance Policy:

Lecture attendance is mandatory. Student is allowed maximally 15% absentia of the total module hours.

More than this percentage, student with an excuse will be drawn from the module. Otherwise, student will be deprived from the module with zero mark assigned.

Expected Workload

On average you should expect to spend at least (9) hours per week on this module.

Text Book(s) and Supporting Materials:

Text book(s):

Title:
Author(s)/Editor(s):
Publisher:
ISBN:
In addition to the above, the students will be provided with handouts by the lecturer.

References:

Students will be expected to give the same attention to these references as given to the Module textbook(s)
