Course description (According to the University Catalogue)

This course the second course of chemistry intended for students in Sciences. The courses introduce the fundamentals theories of chemistry, type of forces in compounds, thermodynamic, equilibrium, kinetics and solution properties.

Course objectives:

- Present a fundamental store a chemical information and understanding of the need for theory.
- Understand the theme centers on the development of theoretical explanations of observed facts.
- Understand the concept energy relationships in chemical reactions, intermolecular forces and physical properties of solutions.
- To give the students some ideas about kinetics, equilibrium and thermodynamic.

Course/ resources

- **Text book/ books (title , author (s), publisher, year of publication)**

Title: Chemistry, 6th edition

Author: James E. Brady

Publisher: John Wiley and Sons, Inc, 2012

- **Support material (s) (vcs, acs, etc).**

- **Study guide (s) (when applicable)**

- **Laboratory Handbook/ books (when applicable)**

Teaching methods(Lectures, discussion groups, tutorials, problem solving, debates, etc)

Lectures, discussions groups, problem solving.

Learning outcomes:

- Knowledge and understanding.
- Understanding of chemical calculation.
- Knowing the relationship in chemical reaction
- Knowing the forces in molecules

- Cognitive skills (thinking and analysis).
- Asses information relevant to a question
- Analysis , evaluate and synthesize information
- Use critical thinking and logic in the solution problems
- Solve problems using basic mathematical skill

- Communication skills (personal and academic).
- Express ideas through written communication by home works
- Improve general performance for student through the interaction with each other in solving chemical problems
- Transferable Skills.
- To generalize the analytical and quantitative skills in this courses and advance cources
- Employ efficient method of analysis and to assess the result of calculation
- Respect roules and regulation of institution
- Psychomotor Skills (When applicable)

Assessment instruments

- Exams (First, Second and Final Exams)
- Quizzes.
- Homework assignments

<u>Allocation of Marks</u>	
Assessment Instruments	Mark
First examination	20
Second examination	20
Final examination: 50 marks	40
quizzes, homework	20
Total	100

Documentation and academic honesty

- Documentation style (with illustrative examples)

Submit your home work in sheet containing your name, number of the homework.

- Protection by copyright

Student should realize that some published information or data are the property of their authors and they are not allowed to use it without asking permission from the originators.

- Avoiding plagiarism.

Plagiarism is the unauthorized use or close imitation of the language and thoughts of another author.

Students must pursue their studies

Course/ academic calendar

week	Basic and support material to be covered	Homework/reports and their due dates
(1),(2)	Chapter 10 relation of intermolecular and intramolecular forces Type of bond	
(3), (4)	Chapter 13 Physical properties of a solution 13.1 types of solution 13.2 a molecular view of the solution process 13.2 A Molecular View of the Solution Process 13.3 Concentration Units 13.4 Effect of Temperature on Solubility 13.6 Colligative Properties	
(5),(6)	Ch. 14 Chemical Kinetics 14.1 The rate of a reaction 14.2 The rate laws 14.3 Relation between reactant concentrations and time 14.4 Activation energy and temperature dependence of rate constants 14.5 Reaction Mechanisms 14.6 Catalysis	
(6)	First exam	
(7),(8)	Ch. 15 Chemical Equilibrium 15.1 The Concept of equilibrium 15.2 Ways of expressing equilibrium constants 15.3 What does the equilibrium constant tell us 15.4 Factors that affect chemical equilibrium	
(9),(10)	Chapter 17 Acid-Base Equilibria and Solubility Equilibria 17.1 Homogeneous Versus Heterogeneous Solution Equilibria 17.2 Buffer Solutions	

	<p>Preparing a Buffer Solution with a Specific pH</p> <p>17.3 A Closer Look at Acid-Base Titrations</p> <p>17.4 Acid-Base Indicators</p> <p>17.5 Solubility Equilibria Solubility Product. Molar Solubility and Solubility</p> <p>Predicting Precipitation Reactions</p> <p>17.6 The Common Ion Effect and Solubility</p> <p>17.7 Complex Ion Equilibria and Solubility</p> <p>17.8 Application of the Solubility Product Principle to Qualitative</p>	
(10)	Second exam	
(11),(12)	<p>Ch. 6</p> <p>Energy Relationships in Chemical Reactions</p> <p>6.1 The Nature of Energy and Types of Energy</p> <p>6.2 Energy Changes in Chemical Reactions</p> <p>6.3 Introduction to Thermodynamics</p> <p>The First Law of Thermodynamics. Work and Heat</p> <p>6.4 Enthalpy of Chemical Reactions</p> <p>Enthalpy. Enthalpy of Reactions. Thermochemical Equations</p> <p>6.5 Calorimetry</p> <p>Specific Heat and Heat Capacity. Constant-Volume Calorimetry. Constant-Pressure Calorimetry</p> <p>6.6 Standard Enthalpy of Formation and Reaction</p> <p>The Direct Method. The Indirect Method</p>	
(13),(14)	<p>Chapter 18</p> <p>Energy and Thermodynamics of chemical reactions</p>	

	18.1 The Three Laws of Thermodynamics 18.2 Spontaneous Processes 18.3 Entropy 18.4 The Second Law of Thermodynamics 18.5 Gibbs Free Energy 18.6 Free Energy and Chemical Equilibrium 18.7 Thermodynamics in Living Systems	
(15),(16)	Ch. 12 Intermolecular forces and liquids 12.1 The Kinetic Molecular Theory of Liquids and Solids 12.2 Intermolecular Forces 12.3 Properties of Liquids 12.4 Crystal Structure 12.5 Bonding in Solids	
(16)	Final exam	

Expected workload:

On average students need to spend 2 hours of study and preparation for each 50-minute lecture/tutorial.

Attendance policy:

Absence from lectures and/or tutorials shall not exceed 15%. Students who exceed the 15% limit without a medical or emergency excuse acceptable to and approved by the Dean of the relevant college/faculty shall not be allowed to take the final examination and shall receive a mark of zero for the course. If the excuse is approved by the Dean, the student shall be considered to have withdrawn from the course.

Other Education Resources

Books

Title: *Chemistry: The Molecular Nature of Matter and Change* , 5th edition
Author : **Martin Silberberg**
Publisher:Mc Graw Hill 2009
ISBN: 978-0-07-1283540**Journals**
