Professor Juri Vain,
Department of Computer Science,
Tallinn University of Technology,
Estonia

Jüri Vain graduated System Engineering speciality from Tallinn Polytechnic Institute, Estonia in 1979. He received his PhD in computer science from the Institute of Cybernetics at Estonian Academy of Sciences in 1987. Professor Vain is the co-founder of the Department of Computer Science at Tallinn University of Technology and has been director of the Department over sixteen years. Currently, he is Professor of Computer Science at the Department of Software Science, Taltech. He has been visiting Professor at Abo Akademi University (Finland), visiting researcher at Oslo University (Norway), Danish Technical University, Tampere University of Technology (Finland), and Eindhoven University of Technology (The Netherland). His current research interests include formal methods, model-based testing, cyber physical systems, human-computer interaction, autonomous robotics, and artificial intelligence. He has been leading researcher in several international projects under EU framework programmes and the coordinator of Estonian-Japan medical robotics collaboration programme. Four PhD students have graduated under his supervision and nine students are currently studying. He has published over 150 scientific articles including journal papers, book chapters and conference papers. He has been an invited lecturer in several international summer and winter schools.
